PROFESSIONAL SUMMARY

Full Stack Engineer with 1.5+ years architecting enterprise-grade SaaS platforms and distributed microservices. Specialized in Java Spring Boot, PHP Laravel, Python Django, and React.js ecosystems. Delivered measurable impact: slashed onboarding time by 45%, eliminated 60% manual operations, and optimized API performance by 40%. Expert in AWS cloud infrastructure, multi-tenant architectures, RESTful API design, and scalable system development for high-growth product environments.

SKILLS

Languages: Java, Python, JavaScript, PHP, SQL, HTML5, CSS3, SASS
Backend & Frameworks: Spring Boot, Spring Cloud, Hibernate, Laravel, Eloquent, Flask, Django, Maven
Frontend & UI: React.js, Bootstrap, Redux, RESTful APIs, Responsive Design
Databases: MySQL, PostgreSQL, MongoDB, SQLite, Aurora DB, Database Optimization
Cloud & DevOps: AWS (ECS, CodePipeline, CloudFormation, S3, Aurora), CI/CD, Git, GitHub
Architecture & Design: Microservices, Multi-tenant Systems, API Gateway, System Design, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Engineer II

Mocha Technologies

Apr 2025 – Present
Vadodara, Gujarat, India

- Led the design and development of **Mocha Snap**, an end-to-end reimbursement platform with approval workflows and direct accounting integration, eliminating manual entries and significantly improving finance operations efficiency
- Built **Mocha DevShield**, a centralized and reusable CI platform on GitHub Actions, enforcing code quality (Pint), static analysis (Larastan), and automated testing across services, standardizing engineering practices and reducing code duplication org-wide
- Owned and delivered IRS **1099-NEC & 1099-MISC** e-filing integrations, enabling compliant tax reporting and fully automated submission workflows for U.S. contractors and vendors
- Engineered a configurable billing and invoicing engine supporting flexible billing cycles, payment schedules, and multi-party settlements (renters, owners, vendors, HOAs), reducing manual billing by 60% and payment errors by 85%

Software Engineer I

Mocha Technologies

Jul 2024 – Mar 2025
Vadodara, Gujarat, India

- Architected an end-to-end Property Management System (Property, Unit, Lease) with role-based access control, multi-tenant isolation, and dynamic permissions, supporting 1,000+ active users at scale
- Led UAT stabilization efforts and drove production readiness, coordinating with DevOps to design and deploy AWS infrastructure (CodePipeline, CloudFormation, ECS, Aurora), achieving 99.9% system uptime
- Optimized database and API performance through query refactoring, indexing, Redis caching, and connection pooling, delivering 40% faster API responses and enabling 3× traffic growth

Software Engineering Intern

Nolan Edutech (Masai School)

Nov 2023 – May 2024
Remote

- Developed full-stack Event Management Platform using Python Flask, MySQL, and React enabling event creation, registration workflows, participant tracking, and email notifications, successfully handling 500+ concurrent users with 99.5% uptime and sub-200ms response times

TECHNICAL PROJECTS

Distributed Hotel Review System | Java, Spring Boot, Spring Cloud, MySQL, PostgreSQL, MongoDB

2024

- Architected and scaled Spring Cloud microservices with service discovery, API Gateway, centralized config, JWT security, fault tolerance, and intelligent routing, enabling resilient, production-grade distributed systems
- Designed a polyglot data architecture using MySQL (transactions), PostgreSQL with geospatial indexing (complex queries), and MongoDB (high-volume data), achieving 35% performance gains and supporting horizontal scalability

EDUCATION

Masai School

Full Stack Web Development – Intensive 1200+ Hour Software Engineering Bootcamp

August 2022 – July 2023
Remote

Somayya Polytechnique

Diploma in Electrical Engineering — CGPA: 8.1

June 2020 – July 2022
Chandrapur, Maharashtra
